RATIONALE

In the last decade, there has been an unprecedented growth in areas of information science, communication and computing. Because of the fast growth, several abstract and core areas seem to be losing out of their due importance. On the other hand there lie several newer challenges, which require solution of these very concepts. There is requirement of synergy between different fields / areas so that critical problems are offered innovative solutions. This has resulted in increased demand of the personnel in industry who are well versed with abstract concepts in mathematical modeling & simulation & are capable to apply them in area of computer & information technology. Keeping in mind the current & future needs of the industry & academia, **M.Sc. (Applied Mathematics)** program was initiated by the institute in 2006. The Program is specialized in the area of Computing & Informatics. The course structure has been so planned that candidate after passing out shall not only be master of certain concepts & practices of Mathematical modeling, but shall be able to interplay between Mathematics and Applications, specially in the field of computing and informatics. After completing this program, the enthusiasts can pursue company jobs, M.Phil. and Ph.D.

OBJECTIVES

- To develop basic skills of solving in an efficient and effective way.
- To explore the computer science for promoting research & development.
- To develop manpower for problem solving at mathematical level and support information technologists.
- To strengthen the foundation in the fast growing software and web development industries.
- To provide placement opportunity to the BSc / BCA / BE enthusiasts in the IT / software sectors.
- To transform graduate enthusiasts to specialists.
