Subject Code & Name	Instructions Hours per Week			Credits			
DCR2G4 Industrial Communication	L	T	P	L	T	P	Total
	3	1	0	3	1	0	4
Duration of Theory Paper: 3 Hours							

Objective: The focus of the course is on the protocols, algorithms and tools needed to support the development and delivery of advanced Industrial network for Control and communication

Prerequisites : Programming ability and an understanding of basic networking, OS, and architecture issues.

COURSE CONTENTS

UNIT-I

Historical Overview of Industrial Automation and Communication Networks, Hierarchical Levels in Industrial, Communication Networks, Transmission Methods, Industrial Network Components, Network Topology.

Serial Communication Standards: Standards organizations, Serial data communication interface standards, Balanced and unbalanced transmission lines, Synchronous & asynchronous communication, RS 232, 422, 485 interface standards and Troubleshooting.

Parallel Communication Standards : Parallel data communications interface standards - General purpose interface bus (GPIB) or IEEE - 488, The Centronics interface standard, The universal serial bus (USB), Different configuration modes - two wire & four wire point - to -point & multidrop connections.

UNIT-II

HART Communication protocol - Evolution of signal standards, features of HART protocol, Communication modes, HART networks, HART Data format or telegram structure, field device & Control system interface to HART bus, HART cabling considerations, HART commands and types, HART field controller implementation, 3 layers of HART-OSI model, DDL and compatibility, Advantages and applications of HART protocol.

UNIT-III

Field Bus: Basics, Architecture, OSI -model, FF/Foundation FB segments, interconnection type - distributed and Chicken foot, FFB types -H1 & HSE, Network design and system configuration, General considerations, advantages of FB & Foundation FB and their comparison.

UNIT-IV

Controller Area Network DeviceNet, CANopen, Interbus, Actuator Sensor Interface (AS-I), ControlNet.

UNIT-V

An Introduction to Industrial Ethernet Ethernet's Roots', Ethernet Physical Layer, Data Link Layer, The Ethernet Frame, Hubs and Switches, Higher Level Network Functions, Ethernet and Industrial Systems, Industrial Ethernet communication protocols
